It was agreed that at USIB today, where the paper is on the agenda, a decision should be made to ask that the paper be redone, coordinated, and perhaps issued as a SNIE. 25X1
Bross noted the importance of providing sufficient official status to the paper to permit it to have maximum use in policy consideration.

25X1 [] reported that the briefing book on OXCART deployment is ready for dissemination after attachment of an addendum which would make the point that the latest U-2 coverage provided exploitable photography on only two of the eighteen targets overflown in the China border area.
